

To Whom it May Concern:

I believe that you should adopt New Jersey's law instead of denying us the law that has worked wonders. People call you during dinner time, and lately, people have been complaining of telemarketers calling at such times as 2am. Why would anyone want to take away a law that helps people have un-interrupted meals and sleep.. that's a few of the many things we need today and we can actually help it come along. Furthermore, there are bigger issues that this Nation faces that the FCC has to deal with that a little thing like the DO NOT CALL LAW of NJ. Leave the states alone and worry about all the garbage you let out children hear on the radio and on the television.
